JavaNone1

java-standalone - 1.7

version :1.0.0-SNAPSHOT

A standalone application is one that can be executed independently and would execute and produce some output either as a UI or on the JVM console. Any java class with a main method can be considered a mini standalone java application.

EXTERNALMODULE

jdom

JDOM is a way to represent an XML document for easy and efficient reading, manipulation, and writing.

gson

Gson is a Java library that can be used to convert Java Objects into their JSON representation. It can also be used to convert a JSON string to an equivalent Java object. Gson can work with arbitrary Java objects including pre-existing objects that you do not have source-code of. Gson support java generics and doesn't require any special annotations.
